WHO WE ARE

HVAC Concepts, a Fidelity Building Service Group® company, is in the business of creating today's smart building systems using the best of intelligent equipment and devices that will work and perform optimally today and well into the future. Our optimization capabilities have led our customers to realize significantly greater operational and energy management efficiencies, increased reliability, and increased system longevity.

Over the past 30 years, HVAC Concepts has grown to become an end-to-end Building Automation Systems (BAS), Energy Management Information Systems (EMIS) and Systems Integrator of choice, meeting the growing demands for the Building Internet of Things (BIoT), working inside some of the most data security-sensitive facilities in the world for government and private sector customers. We work with both large and small buildings, and single- and multi-facility companies in the Washington, DC area and eastern United States.

Our knowledge, experience and integrity are well-known attributes that have warranted our continued success and assured our customers of having a long-term, reliable partner in us.

HVAC CONCEPTS PERSONNEL TECHNICAL CERTIFICATIONS

- Niagara AX/N4 Technical Certifications
- Niagara AX/N4 Developer Certifications
- Distech Controls Certifications
- Honeywell Certifications
- Johnson Controls FX Certifications
- Licensed Master HVAC
- Licensed Master Electricians
- Journeyman Refrigeration/HVAC
- 3rd Class Steam Engineer
- 2nd Class Steam Engineer

CUSTOMER TRAINING

With our Training Services, your staff will learn how to take advantage of your new building solution, and it will be tailored to accommodate their experience level, thus realizing a greater return on your investment. We are committed to providing continual education and technical support for our customers.

WHAT WE DO

BAS & EMIS SOLUTIONS

HVAC Concepts offers end-to-end Building Automation Systems solutions and understands that Energy Management Information Systems are not a one-size-fits-all endeavor.

REMOTE MONITORING

HVAC Concepts offers 24/7 remote monitoring and alarm management services. Our Remote Operations and Support Center is staffed by BAS specialists 24 hours a day, 7 days a week, 365 days of the year.

ADVANCED ANALYTICS

HVAC Concepts provides customers with the means to devise and perform advanced analytics of their data that is collected, and we can make it immediately available for evaluation.

SYSTEMS INTEGRATION

As an Integrator of Things™, HVAC Concepts integrates unique and diverse intelligent devices into holistic edge-to-cloud/enterprise solutions for the Internet of Things.

"The success Wawa has experienced over the years is in no small part due to Wawa finding and working with a true visionary partner like HVAC Concepts. They do so many things right because of their experience and integrity, and they embrace and embed themselves with the visionary aspects we collectively bring to the table."
